Object: Requesting for late payment of fee for patent application no. 10/669,668 filing date 09/23/2003 to accelerate examination process of the application in view of the tight financial situation of the inventor

Attn: Mr. Director David Kappos  
United States Patent & Trademark Office  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Mr. David Kappos,

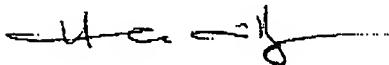

I regret to advise that I actually find serious financial trouble, it results that I am inability to pay fees for Revival, Notice of Appeal and Brief for the above-mentioned application, what with the fact that numbers of patent applications were filed in your office pending since years ago having over passed a normal issuing period of two years of an application case, what with the situation that my pre-grant materials were published by your patent office in which infringers are using them in business but refusing to pay royalties to me with an excuse of the published application(s) being not a valid patent to collect royalties.

I have contacted IRS with an effort to get certain loan/refund from them but I still do not receive a favorable reply yet, even though an invention will help to create new jobs of activities for producing taxable revenues.

I appreciate very much and request that you would accept late payment of the processing fees for patent application no. 10/669,668 at a later stage until the patent is issued to accelerate examination process of the application in view of the tight financial situation of the inventor.

Thank you for your appreciation and reply.

Respectfully yours,

Henri Duong
